

Least Profitable Month by Margin

May 2026 was the least profitable month, recording the lowest margin percentage at **55.75%** — the only month to dip below 56% across the entire dataset. Despite having the second-highest revenue of any month (\$205K), direct costs were also at their peak (\$90.7K), compressing the margin.

55.75%

Margin % — May 2026 (low-
est)

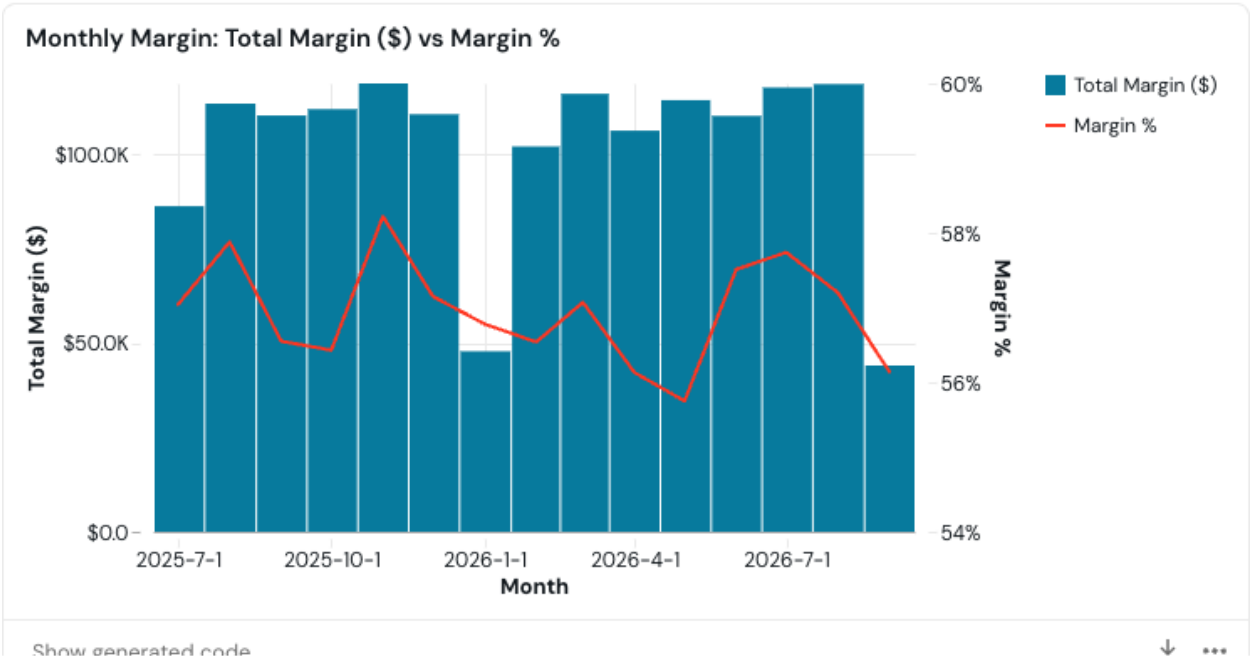

\$114,346

Total Margin — May 2026

\$90,743

Direct Cost — May 2026
(highest on record)

The chart below shows total margin (bars) and margin % (line) across all months. The margin % line is notably flat — ranging only from 55.75% to 58.22% — indicating consistent cost control overall, with May 2026 as the clear outlier at the bottom.

Note: July 2025, January 2026, and September 2026 show lower absolute margin figures, but these reflect partial-month data (fewer clinic-days recorded), not lower profitability rates. May 2026 is the only full month with the lowest margin %. [avanti_dev.gold.mart_clinic_monthly](#)
